

**SPECIFICATION AMENDMENTS**

Please amend the Abstract as follows:

**ABSTRACT**

An electro photo multi functional peripheral apparatus comprises a main body which is provided with an optional device such as a duplex module, a sorter, a power stacker and a large scale paper feeding unit at one side thereof. A feeding unit for feeding a recording paper is mounted at the other side of the main body. A feeding cassette is mounted at a lower portion of the main body. A multipurpose feeding unit assembly is removably mounted at a center portion of the main body and horizontally transports the recording paper fed from the feeding unit. The main body is formed with a first, a second and a third paper transport paths for discharging the recording paper fed from the multipurpose feeding unit assembly, the feeding cassette and the ~~optional device~~ duplex module, respectively.

**Please change the paragraph that bridges pages 3 and 4, lines 14 through 6 to read as follows:**

In order to accomplish the above object, the present invention provides an electro photo multi functional peripheral apparatus comprising a main body which is provided with an optional auxiliary device such as a duplex module, a sorter, a power stacker or a large scale paper feeding unit located at one side thereof. A feeding unit for feeding sheets of recording paper is mounted at the other side

of the main body. A feeding cassette is mounted at a lower portion of the main body. A multipurpose feeding unit assembly is removably mounted at a center portion of the main body and horizontally transports the recording paper fed from the feeding unit. The main body is formed with a first, a second, and a third paper transport paths for discharging the recording paper and paper fed from the multipurpose feeding unit assembly, the feeding cassette and the ~~optional device~~ duplex module, respectively.
